Well Harvey nailed that one.

I have emails to show that were. I bet they had no idea what a viewer is.

Great. Do the regional and headquarters public affairs people know about the draft public viewer and is anyone in OEM/EOC interacting with them on what should go public and what shouldn't?

Harvey,

We have a draft public viewer ready. We just need the regions/HQ to decide if they want to release it. We have services built that could feed a public facing geoplatform site if needed.

Here is the response I provided to HQ regarding mapping of data for this ER.

Harvey,

It is my understanding that all available geospatial data is in the operational viewer including the water sampling data, and that the JIC is still waiting for approval from D.C. to release a public facing viewer. We also have deployed Region 8's SADIE tool that allows for the integration of the analytic data with the geospatial data presented in the viewer. Here is the operational viewer which is **NOT** for public release.

Sure, copying our national geospatial support team on this. Who are you working with in Region 8? Also copying Region 8 GIS contacts.

Do you have an idea of how you want to present the data?

Harvey and Kim,

We're getting ready to go live with the spill web site for the Gold King Mine spill. On the call with the regions, the need for a way to map out the water sample data became pretty clear.

Can we engage your team to see what's possible with accomplishing this?
